TOX[®]-ElectricDrive servo drive extra short

Type EXe-K version 803 with planetary roller screw

Advantages

- extra short
- small space requirement

With its extra short design, this servo press can be used in compact systems with limited height. In addition, this version 803 is available with a further shortened stroke length of 50 mm.

E version:

The EdgeUnit can be flexibly mounted on the housing in the grooves on the front, on the left or right or externally. The EdgeUnit is connected via the connecting cable (length approx. 1.5 m) from the terminal box to the EdgeUnit.

Installation length comparison:

Drive	Nominal force	Stroke	Installation length
EXe-K version 803 (shortened stroke)	30 kN	50 mm	480 mm
EXe-K version 803	30 kN	150 mm	580 mm
EXe-K	30 kN	150 mm	703 mm

TOX[®]-ElectricDrive servo drive extra narrow

Type EPMK version 226, 10 and 25 kN

Advantages

- extra narrow
- narrow space requirement

With its narrow design of only 68 mm, this servo press can be perfectly combined in series with an axial distance of less than 70 mm. This way, tasks can be realized in a confined space, e.g. when pressing valves into a cylinder head.
